Available for a final-year internship (PFE) in AI from February 2027 · Morocco or abroad

PROFILE

Final-year engineering student at UIR (Computer Engineering, Big Data and AI, degree expected in 2027). Skills in machine learning, data processing, generative AI and Python development. Autonomous and curious, I want to contribute to applied AI projects through my final-year internship.

SKILLS

AI and modelling	machine learning, deep learning, data preparation, model training and evaluation.
NLP and generative AI	Transformers, DistilBERT, LLaMA, CrewAI, multi-agent systems; RAG practised with guidance.
Computer vision	image classification, Azure Custom Vision.
Data	SQL, Oracle 19c, Neo4j, SQLite, Hadoop, Spark, MLlib, HDFS, Hive, Parquet.
Development	Python, FastAPI, Streamlit, REST APIs, WebSocket; Java, JavaScript, PHP, HTML/CSS.
Tools	Git, Microsoft Azure.

PROFESSIONAL EXPERIENCE

Capgemini Maroc — Internship, AI agent portal development 2026 · 4 weeks

- Design and development of AI Expert Hub: agent catalogue, expert search and recommendation.
- HTML/CSS/JavaScript frontend and Python/FastAPI backend; independent conversations, attachments, voice dictation and customisable experts with SQLite persistence.

CIPROTEC — Python development internship 2026 · 2 weeks

- Application to track invoices, due dates and customer contact details.
- Automatic WhatsApp reminders according to due dates; Streamlit interface, Python backend and Meta for Developers services.

AI Crafters — Artificial intelligence internship 2025 · 4 weeks

- Centralisation, categorisation and documentation of the company's applications; built a platform bringing all the applications together in a single portal.
- Data processing and structuring.

Vert Consulting — Web development internship 2024 · 4 weeks

- Contribution to a web management application for Atlas Vétérinaire (stock, customers, sales, revenue) using HTML, PHP and a database.

ACADEMIC PROJECTS

Customer review analysis — NLP and AI agents. Fine-tuning DistilBERT for sentiment analysis; collection, analysis, human validation and report-generation agents. Streamlit, CrewAI and Gemini API.

Energy consumption prediction — Hadoop, Spark and MLlib. Big Data pipeline, HDFS/Hive/Parquet storage and feature preparation for modelling.

Vehicle classification — Azure Custom Vision. Training and deployment of an image classification model for electric and combustion vehicles.

Other work: LLaMA/Neo4j recommendation chatbot; Oracle 19c distributed data warehouse.

EDUCATION

International University of Rabat (UIR) — Engineering degree in computer engineering, Big Data and AI 2022 – 2027 (expected)

Currently in 5th year (3rd year of the engineering cycle). Preparatory cycle: 2022 – 2024 · Engineering cycle: 2024 – 2027.

LANGUAGES

Arabic: native · French: fluent · English: professional
